GIRLS in ENGINEERING

Join us this summer for a week of exciting hands-on activities, design challenges, and behind-the-scenes lab tours. Lead by UC Berkeley staff and researchers, camp introduces participants to the many facets of engineering, design thinking, and real-world problem solving in a safe, supportive, and inclusive environment.

GiE is open to all gender identities.

Scholarships Available!

GiE awards scholarships based on financial need and actively recruits students from low socio-economic backgrounds and underrepresented minority groups.

Camp Format

At this time, due to the continued risks associated with the pandemic, camp will be offered online with possible in-person events if conditions allow.

Online camp will feature half-day programming, from 9am - 12pm, with optional virtual lab tours in the afternoon. Kits of parts will be distributed prior to camp and will include all the materials needed for the activities.
